DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Hidaka (U.S. Patent No. 5880493).

Hidaka teaches a semiconductor device (See Fig. 13) comprising unit areas (cc1 and cc2) placed in plural form in a first direction; a first interconnection (LC2) extending in the first direction over said plurality of unit areas; a second interconnection extending in the first direction along said plurality of unit areas and outside said plurality of unit areas (Lb1); and wiring areas provided adjacent to a first unit area of said plurality of unit areas and provided with a third interconnection extending in a second direction intersecting the first direction (FT7); wherein said first unit area has one or plural MOSFETs (Col. 3, lines 34+) formed therein, for implementing a specific logical function, and said third interconnection (LC3) formed in said each wiring area is used to

transfer a signal between a circuit for implementing the logical function, which is formed in said first unit area and said second interconnection (See fig. 13).

Response to Arguments

Applicant's arguments filed 9-18-02 have been fully considered but they are not persuasive. Arguments regarding the rejections under 35 USC § 102 are not persuasive. Applicant argues that:

- The claims recite language that necessitate the third line to effect connection between the second line and the terminal of the MOSFET, which, according to the applicant, necessitates a connection of the third line with the second line

The above arguments are not persuasive because:

- Applicant has failed to distinguish the claimed invention from that disclosed by the prior art. See that no electrical or, moreover, no direct electrical connection is claimed. See that the wiring lines/layers/interconnections intersect one another as claimed. Also, note that Lb1 is not suspended on air, and that, as mentioned above, direct connection nor electrical connection is claimed. Even if somehow located on an air gap, layer Lb1 would meet the claims as drafted for the reasons discussed above.
-

- Additionally, see that the second line is connected to a terminal (see V40)
- Furthermore, "used" does not imply/equate electrical connection

Regarding the Double Patenting rejection, it has been withdrawn.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
